Summary

Curious, adaptable B2B sales professional with a psychology background and international experience in Toronto and Singapore. History of successfully closing B2B clients through cold outreach. Managed a 40+ founder pipeline in HubSpot CRM, leveraging data to gain insight into the buyer's decision-making process. Adept at creating copy that creates engagement from the target buyer. I'm a straightforward communicator who brings positivity to every challenge.

Work Experience

Founder & B2B Consultant Jan 2024 – May 2024

Lutalica (Digital Consultancy) • Toronto, ON

- Closed 3 B2B client engagements end to end: prospected through cold email and LinkedIn, ran discovery calls, and wrote proposals that turned technical deliverables into plain-language business outcomes.
- Built an outbound pipeline from scratch, opening conversations with audit-style insights (page speed, GA4 tracking gaps) instead of generic pitches.
- Owned every account from pitch to delivery, running several clients at once, all delivered on time.
- Proved value to clients with measurable results: 2 landing pages reached Google's first page, and one redesign cut bounce rate by 12 points.

Marketing Associate (Co-op) May 2025 – Aug 2025

Toronto Business Development Centre • Toronto, ON

- Managed a pipeline of 40+ startup founders in HubSpot CRM, automating qualification follow-ups by program fit so the team could focus on high-intent conversations.
- Analyzed CRM and campaign data to determine which messages moved founders to enroll, then A/B tested 6+ outreach variations, lifting open rates from 22% to 32% and click-through from 1.8% to 3.1%.
- Presented weekly pipeline insights to the sales and program teams, shifting budget focus and budget toward the channels producing the most qualified inquiries.
- Generated warm leads for the founder pipeline through 3 events, all of which sold out with 200+ attendees each.

Research Assistant, Blended Learning (Co-op) Sept 2024 – Dec 2024

National University of Singapore (NUS-ISS) • Singapore

- Used SQL and Excel to trace where prospects dropped out of the inquiry funnel and presented the drivers to leadership, reshaping the follow-up workflow.
- Cut prospect response time from 48 hours to under 24 by merging 3 intake forms into 1 with autoreplies.
- Researched 8 competing institutions on pricing, positioning, and channels, guiding the team's go-to-market spend.
- Replaced 4 teams' separate spreadsheets with one KPI dashboard, eliminating weekly manual reporting for leadership.

Projects

Paid Search Diagnostic — Growth Analyst Case Study Mar 2026

B2B corporate gifting platform (timed, 90 minutes)

- Diagnosed why a B2B company's cost per qualified lead was rising, identified budgeted investment leaking to consumer searches, mobile, and weekends when buyers weren't active.
- Recommended moving that spend to the campaigns reaching real buyers, projected to lift conversions 40% and cut cost per acquisition about 18% at the same spending levels.
- Built an interactive dashboard of the before-and-after numbers, turning a technical analysis into a clear business case.

Education

Honours Bachelor of Science, Psychology (Co-op) 2021 – 2026

University of Waterloo • *Waterloo, ON*

Relevant Coursework: Advanced Data Analysis, Psychology of Thinking, Research Methods
